□

Laser-Run is a Laser Rifle Battle Arena, these arena's are generally known as "Laser Tag Arena's", where the competitors wear vests with built in Laser Detectors and carry plastic guns which emit a harmless "Laser" light. When a beam of light from the gun hits one of the detectors in a vest, the built in lights on the vest go solid to inform all participants that that player is temporarily out of the game, at the same time the "hit" players weapon is disabled. After a short period of time, both vest and weapon return to normal and the player can rejoin the game.
